WebCareHealth®
Remote monitoring
of chronic pain

Beat chronic pain
with continuous care.

Chronic pain has become so widespread, it afflicts 100 million patients[*]. That's more than heart disease, diabetes and cancer combined. Fortunately, there's a solution you can offer your patients: remote monitoring of chronic pain by WebCareHealth.

With WebCareHealth, you continuously stay connected to your patients at home. That way, you gain a better understanding of their pain level—and can catch health issues earlier.

Your patients will love it too. Remote monitoring gives them access to you that feels more personal, while getting them more engaged in their own care. So together, you can help conquer their pain and get their life back.

Chronic pain accounts for
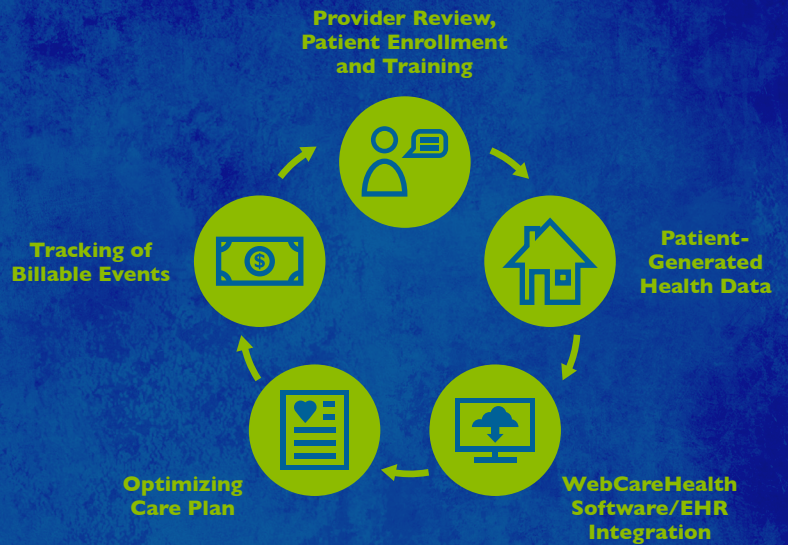

10-16%
of emergency department visits.

Remote monitoring by WebCareHealth offers better value-based care that keeps patients out of the ER.[**]

Continuous care that's more personal.

WebCareHealth's software collects patient-generated health data remotely. That data is available in real-time for the provider to make treatment decisions. Leveraging this technology with your medical expertise can have profound impacts on your patients.

Provider Review, Patient Enrollment and Training

Patient-Generated Health Data

WebCareHealth Software/EHR Integration

Optimizing Care Plan

Tracking of Billable Events

Designed to make your office run smoother.

Improved Care

Reduced Administrative Burden

Provider Reimbursement

Improve Patient Adherence

WebCareHealth is run by providers and nurses, so we know what it's like to be in your shoes. We're driven to create technology that helps you deliver more personal and more effective care for your patients.

Give your chronic pain patients the gift of health. And freedom. Partner with WebCareHealth.
